You're welcome.

Also, attached is a 2-pager with background on the Clean Air Act Section 126 petitions. We have a statutory deadline of January 25, 2017, to act on a 126 petition from Connecticut. I am providing this pager, in case Sarah gets any questions about this deadline or these petitions.

Josh – Here are the most significant impacts of withdrawal. Let me know if you have any questions.

NSPS Grain Elevators – Amendments

Ex. 5 - Deliberative Process

- Public health protection may be reduced

- o The requirements of the NSPS amendments are anticipated to reduce emissions by 24 tons of PM₁₀ each year. While we expect that these PM₁₀ emissions reductions will result in improvements in air quality and reduce health effects associated with exposure to air pollution resulting from these emissions, we have not quantified or monetized the benefits of reducing these emissions for this rulemaking. This does not imply that there are no benefits associated with these emission reductions.

Proposed Federal Implementation Plan for Existing Oil and Natural Gas Well Production Facilities, Uintah and Ouray Indian Reservation in Utah

- Delayed public health protection

Ex. 5 - Deliberative Process

One related request – it's likely we'll also be asked for the impacts, if any, of the withdrawal from OMB of the grain elevators proposal and the Uintah proposal. Can you pls write up any thoughts on grain elevators? And re: Uintah, I can check in w/ the region, unless you have some thoughts on that one too.

Josh
